- Abstract..... 1
- Introduction 2
 - Purpose and Scope..... 5
 - Previous Investigations 7
 - Methods of Investigation 10
 - Acknowledgments 12
- Description of Study Area 12
 - Physiography 12
 - Geologic Setting 13
 - Climate..... 20
 - Vegetation 20
 - Land and Water Use..... 21
- Hydrologic System 24
 - Precipitation and Evapotranspiration..... 24
 - Precipitation..... 24
 - Evapotranspiration 25
 - Surface-Water System 33
 - Tributary Streams 34
 - Percent Valleywide Runoff 35
 - Tributary Stream Recharge 39
 - Ungaged Runoff..... 43
 - Mountain-Front Runoff between Tributary Streams 43
 - Runoff from Bedrock Outcrops within the Valley Fill 44
 - Owens River and the Los Angeles Aqueduct..... 45
 - Lower Owens River 48
 - Reservoirs and Small Lakes..... 49
 - Reservoirs 49
 - Small Lakes 50
 - Canals, Ditches, and Ponds..... 51
 - Canals and Ditches 51
 - Ponds 52
 - Owens Lake 53
 - Ground-Water System 53
 - Geometry and Boundary Conditions 54
 - Hydrogeologic Units and Subunits..... 54
 - Hydraulic Characteristics 58
 - Movement of Ground Water 59
 - Ground-Water Budget..... 64
 - Discharge from Pumped and Flowing Wells 65
 - Springs and Seeps 67
 - Underflow 70
 - Irrigation and Watering of Livestock 71
 - Ground-Water Quality 71
 - Ground-Water Flow Model..... 72
 - General Characteristics..... 73
 - Representation of the Aquifer System 73
 - Approximation of Recharge and Discharge..... 76
 - Simulation Periods..... 78
 - Calibration 79
 - Verification..... 81
 - Sensitivity Analysis 88

Use, Limitations, and Future Revisions	94
Discussion of Simulated Results, Water Years 1963–88	98
Evaluation of Selected Water-Management Alternatives	102
General Water-Management Considerations.....	102
Simulation of Selected Water-Management Alternatives.....	103
Alternative 1: Continue 1988 Operations.....	104
Alternative 2: Continue 1988 Operations with Long-Term Changes in Climate.....	109
Alternative 3: Increase or Decrease Long-Term Average Pumpage	112
Alternative 4: Manage Periodic Variations in Runoff and Pumpage.....	116
Optimal Operation of Well Fields	123
Reliability of Results.....	127
Potential Changes in Operation.....	128
Need for Further Studies	131
Aquifer System	131
Ground-Water Flow.....	132
Surface-Water Flow.....	132
Water Budgets	132
Native Vegetation	132
Water Management	133
Summary and Conclusions.....	133
Selected References	141

PLATES

1. Hydrographs showing measured ground-water levels and simulated hydraulic heads for selected wells in the Owens Valley, California..... In pocket
2. Maps showing hydrogeologic model zones and hydraulic parameters for each layer of the ground-water flow model in the Owens Valley, California..... In pocket
3. Maps showing locations and average values of simulated ground-water recharge and discharge in the Owens Valley, California, for water years 1970–84..... In pocket

FIGURES

Frontispiece. Vertically exaggerated perspective and oblique view of the Owens Valley, California, showing the dramatic difference in topographic relief between the valley and the surrounding mountains.

1. Map showing drainage areas and physiographic and cultural features of the Owens Valley and the Mono Basin, California
2. Map showing location of detailed hydrologic investigations and ground-water flow models for the Owens Valley, California, 1982–88
3. High-altitude infrared imagery showing major geologic, hydrologic, and cultural features of the Owens Valley, California
4. Map showing generalized surficial geology of the Owens Valley drainage basin, California
5. Typical hydrogeologic sections of the Owens Valley, California
6. Photographs of native plant communities in the Owens Valley, California
7. Map, graph, and table showing contours of mean annual precipitation, relation between recent mean annual precipitation and altitude, and data for selected precipitation stations in the Owens Valley, California ...
8. Graph showing annual precipitation at Bishop and Independence, California
9. Map showing estimated average annual transpiration by native vegetation during water years 1983–87 in the Owens Valley, California
10. Photographs of major surface-water features in the Owens Valley, California
11. Map showing location of the Owens River–Los Angeles Aqueduct system, the lower Owens River, tributary streams, lakes, reservoirs, spillgates, major gaging stations, and selected pumped wells in the Owens Valley, California
- 12, 13. Graphs showing:
 12. Annual-runoff probability for the Owens Valley, California.....
 13. Streamflow relations for selected tributary streams in the Owens Valley, California
- 14.–17. Maps showing:
 14. Ground-water conditions in the defined aquifer system of the Owens Valley, California, spring 1984
 15. Transmissivity of valley-fill deposits as determined from aquifer tests in the Owens Valley, California.....

16.	Average horizontal hydraulic conductivity of valley-fill deposits in the Owens Valley, California	62
17.	Location of springs, seeps, pumped or flowing wells, and approximate area of well fields in the Owens Valley, California.....	68
18.	Graph showing relation between annual pumpage and annual runoff for the Owens Valley, California.....	70
19, 20.	Maps showing measured and simulated potentiometric surfaces in the Owens Valley, California, spring 1984, for:	
19.	Hydrogeologic unit 1 (upper model layer).....	82
20.	Hydrogeologic unit 3 (lower model layer).....	84
21.	Map and graphs showing simulated ground-water recharge and discharge during water years 1963–88 in the Owens Valley, California	86
22.	Graphs showing sensitivity of simulated hydraulic heads in the Owens Valley, California, to variations in recharge and pumpage at wells in recharge areas, near well fields, and distant from both.....	90
23.	Map showing simulated change in water-table altitude in the Owens Valley, California, between water years 1963 and 1984.....	95
24.	Diagram and graph showing simulated ground-water flow rates near the fast-drawdown site at Independence, California.....	100
25.	Schematic section across the Owens Valley near Independence, California, showing ground-water flow under different pumping conditions	101
26.	Map showing simulated change in water-table altitude in the Owens Valley, California, between water year 1984 conditions and 1988 steady-state conditions,	106
27.	Graph showing simulated ground-water budgets for the aquifer system of the Owens Valley, California, for water years 1963–69, water years 1970–84, and 1988 steady-state conditions.....	107
28, 29.	Sections showing the simulated water table in the Owens Valley, California, for 1988 steady-state conditions with different quantities of:	
28.	Runoff	110
29.	Pumpage.....	114
30.	Diagram of water-management alternative 4 for the Owens Valley, California.....	117
31.–33.	Maps showing simulated change in water-table altitude in the Owens Valley, California, for water-management alternative 4 at the end of:	
31.	Period I, representing 3 years of drought	118
32.	Period II, representing 3 years of recovery	119
33.	Period III, representing 3 years of wet conditions	120
34, 35.	Maps showing simulated decline in water-table altitude in the Owens Valley, California, resulting from:	
34.	A unit increase in pumpage at each well field.....	124
35.	Maximum pumpage at each well field	126

TABLES

1.	Ground-water and vegetation study sites in the Owens Valley, California, 1982–88.....	7
2.	Characteristics and purpose of ground-water flow models developed for the Owens Valley, California.....	11
3.	Native plant communities in the Owens Valley, California	23
4.	Historical periods of similar water use in the Owens Valley, California	23
5.	Composition of native plant communities, ground-water-level and precipitation data, and range in evapotranspiration estimates at vegetation study sites in the Owens Valley, California.....	29
6.	Selected surface-water gaging stations and pumped wells in the Owens Valley, California.....	38
7.	Percent of long-term average annual runoff for the Owens Valley, California, water years 1935–88.....	39
8.	Mean annual discharge at selected gaging stations on the Owens River–Los Angeles Aqueduct system in the Owens Valley, California	45
9.	Location of wells and values from aquifer tests in the Owens Valley, California	155
10.	Ground-water budget for the aquifer system of the Owens Valley, California.....	66
11.	Simulated ground-water budget for the aquifer system of the Owens Valley, California, water years 1963–88	In pocket
12.	Map coordinates for the ground-water flow model of the aquifer system of the Owens Valley, California.....	74
13.	Recharge and discharge approximations for the ground-water flow model of the aquifer system of the Owens Valley, California	76
14.	Simulated water-management alternatives for the Owens Valley, California.....	104
15.	Average pumpage from well fields in the Owens Valley, California	108
