EXPLANATION

Photograph of cuttings—Characteristic shaker sample; depth of sample shown in white text.

Confidence level of fossils—To determine geologic age

Good—More than 6 species, with 3 indicator species; good certainty of geologic age.

Fair—No indicator species, but fossils associated with indicator species; extant (living) species found in the San Diego Formation; fair certainty of geologic age.

Poor—No indicator species, but shell fragments indicative of a general paleo environment; poor certainty of geologic age.

Unknown—No fossils obtained, or indeterminant species; unknown geologic age.
